

an editor opened by 'git commit'. Please make sure all processes

可能是上次提交时网络异常，造成`index.lock`文件没有删除，所以手动 `.git/index.lock`文件即可

ssh: connect to host github.com port 22: Connection refused

向github推送代码时显示上面的错误，首先创建文件 `~/.ssh/config`，然后添加以下内容

```
1 Host github.com
2 User 你的github邮箱
3 Hostname ssh.github.com
4 PreferredAuthentications publickey
5 IdentityFile ~/.ssh/id_rsa
6 Port 443
7
```

Failed to connect to github.com port 443

首先访问ipaddress.com ([opens new window](#))获取 github 的ip地址

这个网站有可能你访问不了，你要自己想想办法了

Domain Age	14 years, 9 months and 21 days (5,408 days)
IP Address	140.82.113.3

然后在修改 hosts 文件，添加记录

```
1 140.82.113.3 github.com
2
```
